European Value

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation EUR (LU0161305163)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI Europe (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of European companies.

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in a concentrated range of equities of European companies. The fund typically holds fewer than 50 companies.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of securities that are significantly undervalued relative to their long-term earnings potential.

Value investments can be out of favour for many reasons, including weak short-term profitability, macro-economic concerns or an under strength balance sheet. These factors can significantly reduce the attractiveness of companies to short term investors and induce discounts to fair value. Our long term focused value investment approach seeks to exploit this in a diversified manner.

The fund is managed with reference to material environmental, social and governance factors. This means issues such as climate change, environmental performance, labour standards or board composition that could impact a company's value may be considered in the assessment of companies.

The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the MSCI Europe (Net TR) index and compared against the MSCI Europe Value (Net TR) index and the Morningstar Europe Large Cap Value Equity sector. The majority of the fund's investments may be components of the target benchmark. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk – Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset

changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charges	1.85%
Charges taken from the fund under certain specific conditions	
Performance fee	
Subject to the "high water mark" principle, 15.00% of the share class outperformance in excess of the MSCI Europe Net TR. See the prospectus for more details. In the fund's last financial year the performance fee was 0.00% of the fund.	

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2019 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in euro after the ongoing charges, the portfolio transaction costs and the performance fee have been paid. Entry charges are excluded from calculations of past performance.

The fund was launched on 31 January 2003.

Glossary: You can find an explanation of some of the terms used in this

document at www.schroders.lu/kid/glossary.

Benchmark: The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. Any comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

Distribution costs: The level of distribution costs in certain jurisdictions may impact the ability of the investment manager to meet the fund's investment objective across all share classes after fees have been deducted.
